

How Often Should You Replace the Parts On Your Taylor Machine?

Often, we receive questions such as, “How often should I replace my Taylor machine tune up kit?” or, “How often should I replace my Taylor machine scraper blades?” Look no further; here are some answers for you.

Part Description	Every 3 Months	Every 4 Months	Every 6 Months	Annually
Scraper Blades		X		
Freezer Door Gasket	X			
Front Bearing	X			
Drive Shaft Seal	X			
Beater Shoes	X			
Draw Valve O-Ring	X			
Prime Plug O-Ring	X			
Pivot Pin O-Ring	X			
Design Cap	X			
Horizon Pump Tube	X			
Pressure Switch Diaphragm	X			

Please note that these are approximate and suggested estimations and depend on the amount of which your Taylor machine is used.

By keeping up with replacing your parts, you will increase the longevity of your Taylor Machine. Please [contact us](#) if you have any further questions. We are happy to help!
