

# THIS TECHNOLOGY RULES

Introducing the world's most advanced commercial grills

# AN INCREDIBLE NEW COOKING PLATFORM

Instinctive gap control. Faster cooking. More precise temperatures. The new Taylor Crown Series grills have arrived to revolutionize kitchens everywhere.

## CONSISTENCY MEETS VERSATILITY

---

These are the first grills with lower plates that automatically adjust their alignment to provide precise, full-contact cooking no matter what's on the menu. This groundbreaking technology, exclusively available from Taylor Company, ensures even cooking and a superior end product.

When combined with other class-leading features like active compression technology and multi-gap menu configurations within a single cook cycle, the new Crown Series helps you serve top-quality food time and again.

# CALIBRATED TO YOUR GOALS. AUTOMATICALLY.

Like all two-sided Taylor grills, the Crown Series is proven to cook at least 50% faster than other platforms. You'll be able to do burgers, steaks, chicken, seafood, veggies, paninis, breakfast favorites and more – all cooked to perfection with unprecedented efficiency.

## Consistent

- Instinctive gapping enhances food quality
- Active compression technology for correct pressure every time
- Edge-to-edge temperature stability
- Daily automatic calibration

## Flexible

- Fast recovery time between cook cycles
- Independent cook zones allow for multiple temperatures and eliminate flavor crossover
- Up to 2" (50.8 mm) extended gap range

## User friendly

- Intuitive touchscreen controls
- Programmable time, temperature and pressure for over 50 menu items
- USB capabilities for effortless menu updates
- Electric power
- Onboard user instructions
- Easy to clean and maintain

## BUILT TO SERVE MODERN FOODSERVICE

---

We developed the Crown Series by working directly with operators. We listened to their needs and applied all of our foodservice industry expertise. The result is a breakthrough cooking platform that delivers improved product consistency, greater menu flexibility, energy savings and easy operation. These are the ultimate “built to serve” grills.
