

EQUIPMENT GUIDE: REPLACING YOUR TAYLOR® PARTS

We often receive questions such as, “how often should I replace my Taylor machine tune-up kit?” or “how often should I replace my Taylor machine scraper blades?”. Here are the manufacturer recommendations for common part replacements.

Part Description	Every 3 Months	Every 4 Months
Scraper Blades		✓
Freezer Door Gasket	✓	
Front Bearing	✓	
Drive Shaft Seal	✓	
Beater Shoes	✓	
Draw Valve O-Ring	✓	
Prime Plug O-Ring	✓	
Pivot Pin O-Ring	✓	
Design Cap	✓	
Horizon Pump Tube	✓	
Pressure Switch Diaphragm	✓	

Please note that these are approximate and suggested estimations and depend on the amount your Taylor equipment is used.

4 Reasons To Only Use OEM Parts

Quality OEM parts will optimize equipment efficiency, increasing your profits

OEM parts are backed by a Manufacturer’s Warranty

Installing non-OEM parts may void your Manufacturer’s Warranty which can result in costly repairs

Using non-OEM parts can cause extensive damage to your equipment

Following parts replacement guidelines and only using OEM parts ensure the efficiency and longevity of your Taylor equipment. Feel free to contact us with questions – we’re here to help!
